### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. The application has been amended as follows:  
In claim 35, line 2, replace the term "insulting" with the term --insulating--.

### ***Drawings***

3. The drawings were received on March 13, 2006. These drawings are not approved.
4. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: The applicant is required to cross hatch all of the drawings as illustrated in the enclosed drawing sheet. Please note the differences between the rubber material and the thermoplastic material. The specification states that the insulating material is made of thermoplastic materials and therefore the insulating material should be cross-hatched as such. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

***Allowable Subject Matter***

5. Claims 35-51 and 54-68 are allowed.
6. The following is an examiner's statement of reasons for allowance: This invention deals with an electrical cable comprising an insulating layer being made of a non expanded polymeric material and at least one insulating layer being made of expanded polymeric material expanded material, wherein the expanded polymeric material is obtained from a polymeric material that before expansion has a flexural modulus at room temperature measured according to ASTM Standard D790, not greater than 200MPa (claim 35). This invention also deals with a process for manufacturing an electric cable wherein the cable comprises a conductor and an insulating coating made of non expanded polymeric material and at least one insulating material made of an expanded polymeric material, wherein the expanded polymeric material is obtained from a polymeric material that before expansion has a flexural modulus at room temperature measured according to ASTM Standard D790, not greater than 200MPa (claim 66). The above stated claim limitations, in combination with other claim limitations, is not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Response to Arguments***

7. Applicant's arguments filed March 13, 2006 have been fully considered and they are persuasive. Specifically, the applicant's argument that "none of the prior art of record teaches electrical cable comprising an insulating layer being made of a non expanded polymeric material and at least one insulating layer being made of expanded polymeric material expanded material, wherein the expanded polymeric material is obtained from a polymeric material that before expansion has a flexural modulus at room temperature measured according to ASTM Standard D790, not greater than 200MPa" is persuasive and therefore the claims have been allowed.

***Communication***

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William H. Mayo III whose telephone number is (571)-272-1978. The examiner can normally be reached on M-F 8:30am-6:00 pm (alternate Fridays off).
